

Security Operations Center

Cyber threats never stop, and neither does our vigilance.

A SOC – or Security Operations Center – is an operational center dedicated to cybersecurity. It brings together experts and specialized tools whose mission is to continuously monitor your IT systems, detect suspicious behavior, and respond quickly to attacks. This monitoring is carried out 24 hours a day, 7 days a week by a team of qualified analysts based in Luxembourg, ensuring continuous responsiveness and operational expertise.

OUR OFFER “R-SOC”

With **R-SOC**, your IT systems are monitored continuously, regardless of your environment. Whether you are a **small or medium-sized business** or a company with a **more extensive IT infrastructure**, our managed security center protects what matters to you, based on your priorities.

Our solutions protect your critical environments, with coverage that can include your **workstations** and **Microsoft 365 environments** (basic protection), your **servers** (optional or standard depending on the package you choose), as well as your **networks**, **cloud environments**, and **business applications** for more complex infrastructures.

Our tools are designed to connect seamlessly to your existing infrastructure and security tools without disrupting your operations. This gives you **professional protection** tailored to your budget, without technical complexity or the need to mobilize internal resources.

◆ **R-SOC** : a comprehensive and customizable offering designed to meet the highest cybersecurity requirements. It provides advanced monitoring of your entire information system—workstations, servers, networks, cloud environments, and business applications—using customized detection rules. The ideal solution for companies seeking comprehensive protection and maximum responsiveness to threats

◆ **R-SOC Tranquility** : an intermediate solution designed to secure your workstations and Microsoft 365 environment, with EDR included. It guarantees enhanced protection thanks to standard, automated detection rules. Perfect for organizations looking to take their first step toward cybersecurity, gain visibility into incidents, and enjoy peace of mind on a daily basis.

WICH SOC TO CHOOSE ?

	R-SOC TRANQUILITY	R-SOC
Workstation protection	✓	✓
Microsoft 365 protection	✓	✓
Servers protection	<i>optional</i>	✓
Network protection	×	✓
Identity protection	×	✓
Cloud protection	×	✓
Installation of an EDR (Endpoint Detection and Response) system with automatic isolation of infected machines	✓	<i>optional</i>
24/7 monitoring & emergency number	✓	✓
CTI (<i>Cyber Threat Intelligence</i>)	✓	✓
SOAR (<i>Security Orchestration, Automation and Response</i>)	✓	✓
Standard and automated detection rules	✓	✓
Customized and tailored detection rules	×	✓
Incident notification	✓	✓
Incident report	×	✓
Monthly report	×	✓
Asset-based billing	✓	✓

Why choose our R-SOC offerings ?

- ◆ **Proactive defense of your infrastructure:** anticipate cyberattacks with continuous monitoring, advanced protection mechanisms, and threat management that goes far beyond traditional alerts.
- ◆ **Real-time threat detection:** Gain instant visibility into attacks with cutting-edge technologies such as CTI and XDR, capable of identifying even the most stealthy threats.
- ◆ **Fast incident response:** Rely on our team of experts and SOAR automation to quickly contain any attack and restore your services without delay.
- ◆ **Continuous monitoring 24 hours a day, 7/7, all year round:** ensure your systems are protected at all times, including at night, on weekends, and on public holidays. In addition, our SOC team can be reached at any time via an emergency number.
- ◆ **Local, personal, and responsive service:** benefit from local support with a supervision center based in Luxembourg and operated exclusively by qualified analysts who are available around the clock.
- ◆ **Structured incident management:** receive immediate notifications in the event of an alert, by phone call, text message, or email, according to the escalation protocol defined together in advance.
- ◆ **Clear and predictable pricing:** you pay based on the number of devices protected, with no hidden costs or unpleasant surprises.
